# LOCKWOOD 001 DEADLATCH™ FOR SAFETY, SECURITY, DURABILITY AND INNOVATION.

**LOCKWOOD 001 DEADLATCH™  
WITH LOCKALERT AND SAFETY RELEASE  
INCREASES SAFETY AND SECURITY**

As the leader of locking technology in Australia, Lockwood is continually developing and improving all of its products.

The **SAFETYRELEASE™** function which automatically releases the internal knob or lever of the deadlatch upon entry, was designed and introduced by Lockwood in 1997.

In another design first Lockwood has added the **LOCKALERT™** safety feature to its latest range of 001 deadlatches.

This innovative feature allows you to see at a glance whether the deadlock function is engaged or released on the inside. **LOCKALERT™** will indicate red if the deadlock function is engaged and green if the deadlock function is released.

<b>SECURITY RATING</b>	<b>S1</b>	<b>S2</b>	<b>S3</b>
<p>S1 - minimum security for low protection against illegal entry.                  S2 - moderate security for medium protection against illegal entry.                  S3 - high security for maximum protection against illegal entry.</p>			
<b>DURABILITY RATING</b>	<b>D1</b>	<b>D2</b>	<b>D3</b>
<p>D1 - minimum durability for low frequency usage.                  D2 - moderate durability for medium frequency usage.                  D3 - high durability for maximum frequency usage.</p>			

## THE AUSTRALIAN LOCKSET PERFORMANCE STANDARD

The Australian Standard AS4145.2 enables the true evaluation of the security and durability of locksets.

The standard specifies performance requirements and describes test methods for strength, security, function and durability. Requirements that relate to security are classified in three grades, based on performance tests that simulate attack. The security rating is based on the lowest test result achieved. Test methods are specified in detail to ensure reproduction and consistency of assessment.

Lockwood 001 Deadlatch™ is a quality product designed and manufactured by Lockwood in Australia that exceeds the requirements of the Australian Lockset Standard. All products carry a security rating and durability rating prominently displayed on the packaging to enable you to make an informed purchase decision.

All Lockwood deadlatches exceed the highest security and durability requirements in AS4145.2.
